About the Author

Eric Fisher is Chief Meteorologist for CBS Boston's WBZ-TV News and anchors weather segments. He is also a contributor the CBS News, reporting on breaking severe weather across the country on the CBS Evening News.

Born and raised in New England, Eric says there are few places on earth that produce a variety of weather like this little corner of the U.S. It offers the challenges of blockbuster snowstorms, hurricanes, tornadoes, heat waves, frigid cold snaps, and dramatic seasonal shifts.

Fisher joined WBZ-TV News from The Weather Channel in Atlanta where he spent three years as a meteorologist. He produced and delivered national forecasts and contributed to numerous live reports on extreme weather for The Weather Channel, NBC Nightly News, TODAY and MSNBC.

A supporter of science and learning, Eric is a member of both the Mount Washington Observatory and the Blue Hill Observatory here in New England. Eric is a graduate of the State University of New York at Albany (SUNY) with a B.S. degree in atmospheric science.
