**Date :** September 25, 2015

Aquarion Water Company is asking customers to conserve water since rainfall has been scarce recently and reservoirs and wells are getting low.

# AQUARION

Here's [the announcement](#) (on the Darien town government website) [from Aquarion](#):

With a lack of significant rainfall, and as a result of the Connecticut Department of Public Health's advisory for voluntary water conservation, Aquarion Water Company is asking its customers to voluntarily conserve water and stop nonessential outdoor water use.

Connecticut is currently experiencing conditions ranging from "abnormally dry" to "moderate drought" due to an extended dry spell, according to the National Oceanic and Atmospheric Administration (NOAA).

With below average rainfall and water demand 9.3% higher this season compared to the same period last year, and using over 9 million gallons more per day, Aquarion's reservoirs and wells are below normal capacity "Due to current conditions, Aquarion is advising customers to voluntarily reduce their water use," said Charles V. Firlotte, Aquarion President and CEO.

"It is important for all of our customers to assist in this effort, to ensure everyone in our entire at-large community has the water they need, when they need it."

Aquarion recommends ways to use water more efficiently, while helping conservation efforts:

- Consider shutting off irrigations systems for the season or reduce irrigation to twice a week. With cooler temperatures, lawns and shrubs require an inch or less of water per week
- Allow grass to grow longer; taller grass is healthier and requires less water
- Use brooms or blowers instead of water to clean decks, driveways and sidewalks
- Don't wash cars or boats with a hose
- Shut off ornamental water displays
- Do not leave water running while washing hands, shaving, or brushing teeth
- Take shorter showers
- Hand-wash dishes in a basin, not under running water
- Repair leaks in plumbing and fixtures
