Date : December 26, 2021

Metro-North's off-peak fares for all trains will continue through Feb. 28, the Metropolitan Transportation Authority has announced.

Also, the railroad announced some discounts, including a new 20-trip eTicket is being introduced on Feb. 25 for travel to and from Manhattan at a 20% discount from peak one-way tickets.

For Monthly Ticket Holders

"If you're a monthly ticket holder, beginning on March 1, 2022, you'll be getting an additional 10% off your ticket cost," the announcement said. "Depending on which zones you travel between, you could save anywhere between 58% and 71% off one-way peak fares."

If, for Some Reason, You're Traveling Within New York City

And for our local city travelers, starting on Feb. 25, we're expanding CityTicket to allow for travel entirely within New York City for just \$5 on all weekday off-peak trains, on the same day you buy your ticket.
