Date : March 8, 2018

While many places around Darien reopened, other than schools, on Thursday, 667 Eversource customers remained without power in town as of 9:30 p.m.

Meanwhile, in New Canaan, 16 percent of customers were without power; 32 percent in Wilton; 21 percent in Westport; 40 percent in Redding and 58 percent in Weston. Aside from Westport, coastal communities in Fairfield County generally had lower percentages of customers in the dark: 7 percent in Norwalk, 4 percent in Stamford and 3 percent in Greenwich.

Around the state as a whole, 6 percent of Eversource customers were without power — 77,587 as of 9:30 p.m. The company doesn't have a "statewide estimated time of restoration" yet, but expects to announce that sometime Friday.

New Canaan Country School, New Canaan Public Schools and Trinity Catholic High School in Stamford will all be closed on Friday.

Police Chief Ray Osborne tweeted at 9:20 a.m., Thursday [this advice](#) to anyone on the roads while the cleanup continues: "Please assume all down wires are energized and stay clear."

Here's Eversource's Friday evening announcement about their efforts to restore power:

Eversource line and tree crews are working non-stop alongside dozens of out-of-state crews to repair the destruction caused by the heavy, wet snow and high winds that hit Connecticut Wednesday afternoon.

The damage caused by the storm is extensive and widespread leaving hundreds of broken poles and thousands of feet of downed power lines around the state. Eversource crews are working directly with communities to clear hundreds of blocked roads, while assessing damage and restoring power to more than 133,000 homes and businesses since the storm began.

Friday, the company expects to announce a statewide estimated time of restoration, when the majority of customers will be restored, with town-by-town restoration estimates shared by the end of the day tomorrow.
